GOLF TEAMS OF THREE CITIES

SERIES OF MATCHES TO START THIS WEEK.

prize to the the Lestey Trophy Contest rates Place of the Philadelphia and New York Meeting Details of the Conditions and the Players selected.

ine of fee from the Golf Association Philadelphia, Massachusetta Golf Assotion and the Metropolitan Golf Associaone on Friday and Saturday. The play will be a perpetual one, a large, fundled silver loving cup presented by Herbert W. Lesley of Philadelphia, and a the abony base is a circlet of silver shields for the records of the contests. The conprions stipulate that the contestants "shall e bona fide residents of the district covered by each association" and also "members n good standing of clubs in said associaby golfers as genuine annual tests of the clative strength in the game of each loality. Next year the contests will be in Philadelphia and the year following at

Three years from now, unless other teams are let in, the matches will again be at a New York links. The Western Pennsylvania Golf Association, which includes Pittsburg. won the open team contest for the Olympic cup put up by the Western Golf Association on the day before the amateur championship at Wheaton. It has since asked for admission to the tricity league and the Maryland and District of Columbia Associaion would also like to join. The present intention is to keep the three-handed league inviolate, and the inscription on the cup states that it is for an annual contest between the teams of the three cities only. Furthermore, the deed of gift states that should the contest terminate the cup shall revert to the donor. This would seem to close the door against new entries, for should one be taken in it would he hard to refuse the requests of the New Jersey, Connecticut, Rhode Island, Vermont and New Hampshire associations for admit ance. When the occasion arises the committee, on which the three organizations are represented, will probably tell the applicants gently but firmly to go off and organize team circuits of their own.

"Pish!" is already the exclamation of the barred out. "The three big cities are trying to start a golding aristocracy." The projectors do not assume any such intentions, for while they represent the three oldest groups of American golf clubs, the only intention is to organize an annual friendly contest that will be not too cumbersome in detail of management. On Friday the Philadelphia and New York teams will play, and the winners will meet teams will play, and the winners will meet the Massachusetts team on Saturday. This order has been fixed by a draw. In future years the first match will be for the privilege of meeting the trophy holders on the second day. A special reason for making the arrangement a permanent order is that members of a team defeated on the first day, who may be pressed for time, need not stay over for the second day, while members of the holding team need not aprear until the second day. not appear until the second day.

while members of the holding team need not appear until the second day.

The consideration as to time is an important one in matches mainly for business or professional men, and the problem has been happily dealt with. The difficulty of getting the men wanted to give up their work for the contest has always been a serious one in the management of the semi-annual matches between New York and Philadelphia. On this account too, the tricity match will only be played annually, and to clear the way for it the New York and Philadelphia match has been dropped.

There was never any trophy in these matches, which were started in 1900. The match was held for the last time in 1904, and taking the count by years and Philadelphia one year, while the teams each won a leg of the contest in 1902 and 1904. As to single matches, New York won 6 and Philadelphia 4. On the aggregate of holes earned the New York team had a great majority, its total being 417 o Philadelphia

As far back as 1895 and 1896 there were home and home matches between St. Andrews and Essex County, Manchester Andrews and Essex County, Manchester Mass... teams, which represented practically the golfing strength of Boston and New York, and in 1896 and for two or three years thereafter there were annual matches between the Philadelphia Cricket Club and the Staten Island Cricket and Baseball Club. There have been other intercity matches, notably one of years ago between St. Andrews and the Chevy Chase teams, but the Philadelphia and Metropolitan Association matches were the first to be an Association matches were the first to be regularly organized and carried out with-out a check. The coming tricity series is the legitimate successor of this match.

out a check. The coming tricity series is the legitimate successor of this match.

In the tricity matches the mornings will be single and the afternoons best ball foursome play. Walter J. Travis is captain of the New York team, and he has made a very representative selection. Besides himself, the team will include Charles H. Seely, the M. G. A. champion; Jerome D. Travers, Findlay Douglas, Archibald Graham, John M. Ward, C. B. Macdonald, Harold Wilcox, Devereaux Emmet, Percy R. Pyne 2d, and as substitutes Ralph Peters, Jr., and R. C. Watson, Jr. The Philadelphia team has not been announced, but it will include H. B. McFarland, J. W. Perrin, A. W. Tillinghast, W. T. West, F. Oden Horseman and W. P. Smith.

The Boston ten have been selected by Herbert C. Leeds and G. Herbert Windeler as a special committee of the Massachusetts Golf Association. The makeup will be F. J. O. Alsob, the former Yale golf captain, who belongs to the Allston and Brookline clubs; Malcolm McBurney of Stockbridge, A. G. Lockwood, the Massachusetts champion for two years, and Hugo R. Johnstone, for as many wars runner-up to him. A.

A. G. Lockwood, the Massachusetts champion for two years, and Hugo R. Johnstone, for as many years runner-up to him; A. L. White, if his college work does not interfere; J. G. Thorp, Oak'ey, and runner-up years ago to H. J. Whigham in the amateur chamrionshin; Percy Gi.bert of Brae Burn and P. W. Whittegrew of Brookline, the once noted "Buck" Whittegrew of Harvard baseball. Alternates will be T. G. Stevenson of Myoria, A. L. Ribley of Oakley, and G. H. Lyalle of the Bellco e Club, Melrose, who won the Boston interscholastic championship of 1903.

CHILD DRINKS CARBOLIC ACID. Said Her Home Was Unhappy and Wanted

to End Her Life. NEW HAVEN, Conn., Oct. 22 .- Mary Jacobiski, 10 years old, told a playmate to-day that her parents quarrelled and that her life was very unhappy.

"Why don't you take carbolic acid," aid the friend, "and you'd be out of trouble

The ten-year-old took five cents from her mother's purse, bought carbolic acid and drank it. The police hurried her to the hospital. may recover.

Sousa's Son to Marry To-day.

John Philip Sousa, Jr., son of the bandmaster, will be married this afternoon to at Linwood, a suburb, after finishing his Miss Eileen Adams, daughter of Mrs. Maria Adams, of 146 West Seventieth street. The ceremony will be performed at the Church of the Blessed Sacrament, Broadway and

Don't ask too much of Opportunity.

Opportunity will knock at your door. It won' ick in the panels. To-day your premium rate on the old-fashioned "paymy-heirs-when-I-die" plan is its lowest. Ask to-day. Immediate answer.

HOW BURST BANK WAS LOOTED. Santa Fe Central Payroll and Suspicious

Hanker Brought on the Crash. PITTERURG, Pa., Oct. 22.—A bank in Albuquerque, N. M., started the crash of the Enterprise National Bank of Alle-W. H. Andrews, the Territorial representative of New Mexico, and resident manager of the Santa Fe Central Railroad, had been doing the banking for the concern through the Albuquerque Bank. He sought to raise money to meet a pay-

roll and failed. He wired T. Lee Clark, cashier of the Enterprise Bank, who was also treasurer of the Santa Fé Central, and Clark telegraphed the Albuquerque Bank president, asking him to accept securities of the Enterprise Bank for the payroll. The president of the bank, feeling that a cashler who would offer his bank's stock as security in a private enterprise was not safe, threw out all the business of the Santa Fé Central.

A note of the Pennsylvania Development Company was then placed in bank to meet the payroll. The Santa Fé Railroad had an option on the road and its sale would have placed them all on their feet, but the deal failed.

President Fred G. Winner says that

President Fred G. Winner says that Bank Examiner Cunningham has told him that the loss will reach \$1,500,000. As the examination proceeds it is discovered that the bank has been completely looted. It is known that all the money for the Santa Fé Central was raised from banks in Pennsylvania carrying State deposits. There is from \$1,500,000 to \$2,000,000 of this paper floating about in banks in western Pennsylvania. If the bank examiner insists that it must be thrown out other bank failures will result.

failures will result.

The State deposits in the Enterprise National Bank were \$1,032,000. The bank carried more State funds for its capitalization than any other bank in the State.

WATCH FOR BLACK HAND MEN. Detectives Trying to Catch Those Who

Sent a Threat to George A. Philips. Detectives Quinn and Fitzpatrick of the West Forty-seventh street station have been watching pillar number 320 of the Ninth avenue elevated line since last Thursday

night. They are waiting for some person

to come along and take from inside the pillar a tomato can filled with stage money The can was placed there by them in an effort to discover the author of a "Black Hand" letter received last Thursday by George A. Philips, a customs inspector, living with his wife and five children on the second floor at 763 Ninth avenue. Philips and his mother own several houses in that neighborhood, including the one he lives in. The letter, which was turned over to

reads:,

DEAR SIR: If you dont not put 1 \$500 in tomatee can in ellevatd piler, 320 -9 ave, we will steal yur goll.

P. S. Dont you try no detective bussinest on us or we will go worser with you. Pu money thare 3 nights.

Capt. Daly and by him to the detectives,

afternoon. The discovery was made by his wife, who cut him down. Mrs. Judd said Prof. Judd had been in a sanitarium. Prof. Judd was born in Orange, N. J.,

and had lived in Hartford, Conn., before coming to Washington to take up his duties as professor of biology at Georgetown University. He was also in the Govern-

The Twenty-third at Religious Service. The Rev. Lindsay Parker, rector of St. Peter's Episcopal Church and charlain of the Twenty-third Regiment, preached his annual sermon to members of the command in the Bedford avenue armory, Brooklyn, yesterday afternoon. There was a large attendance, including men of the Veterans' Association. There was music by the regimental band and the vested choir of St. Peter's Church led in the singing. Col. Wil iam A. Stokes and his staff occu-

Many Poker Players Arrested in Paterson. PATERSON, N. J., Oct. 22.-Early this morning fifty-six men were captured and fined for poker playing at alleged poker joints, and to-night the police raided the place of James H. Carter, in Fulton street, and brought in twenty men and four women. They were all committed to jail.

Paster Stricken in the Pulpit Dies. CINCINNATI, Oct. 22.-The Rev. Dr. John F. Baird, pastor of the Presbyterian church

RICH STRIKE NEAR GOLDFIELD

\$1,100 ORE IN UNCOVERED ON COLUMBIA MOUNTAIN.

Leasers Took #150,000 From Near the Surface, but Stopped Three Feet Short of the Bonanza Stommer Cleanup in Aleska Was About \$5,500,000.

Connected, Net., Oct. 16.- One of the in the Kendall mine on Columbia Mountain, within a mile of Goldfield. A vein of ore four feet wide, that averages \$1,100 to the ton, has been uncovered on the twenty foot level. The mine was opened up by leasers, but they didn't go far down, as they were able to take out \$150,000 near the surface. If they had gone straight down and had not bothered with the lower grade ore near the surface, they would have struck this great bonence as it was encountered only three feet from the level where they shandoned work. In snother shaft a few hundred feet away ore is being taken out which samples \$100 to the

Lone Mountain is one of the new camps that shows great activity. The Princess
Maude is the leading mine and the shaft is
now down to a depth of 150 feet. Ore that
assays as high as \$1,500 per ton has been taken out and the average is good. What will help this district is the establishment of the Tonopah Mining Company's mill, only

nine miles away. Four miles east of Bullfrog is the Hillside claim, which promises well. A cross-cut tunnel run into the hill thirty-five feet shows the hanging wall of a ledge, the ore from which runs from a few dollars to \$24 per ton

In the Gold Bar claim at Bullfrog the shaft is down 150 feet. In the lower workings ore runs from \$30 to \$100 to the ton. As the ore on the fifty foot level only averaged \$26, this shows the increase in value. Ore is being blocked out on several drifts.

The Bellehelen district continues to sur-

prise prospectors. The Gazabo mine shows floats and stringers of ore that run as high as \$1,124 in gold. The Buck claim has ore that runs \$350 in silver and \$6.61 in gold. In the Mammoth mine, twenty-five miles northwest of Reno, fine copper ore has been struck. The rock carries \$10.17 per ton in gold and silver and 40% per cent. In copper. The outcrop in several places shows 15 feet high

and 10 feet wide.
On Cherry Creek, in the White Pine district. last week much excitement was caused by the discovery of rich gold ore in the Great the discovery of rich gold ore in the Great Eastern mine in Gold Cañon district. For several years pieces of float have been on the mountain near by that assayed several thousand dollars to the ton. F. A. Borchert, one of the men who has spent months in searching for the quartz ledge from which this float came, found it last week, covered with three feet of loose soil and rock. The ledge is about 15 inches wide and will average more than \$3,000 to the ton, the ore being literally speckled with coarse gold. CALIFORNIA.

California.

San Francisco, Oct. 16.—B. Levison of Elizabeth, N. J., has bonded the Plummer-Reid-Wade mine in Mono county, which is said to have an enormous deposit of low grade ore that can be worked very cheaply Near by are several mines, notably the Kapeder claims from which rich ore has been taken.

The Yellow Aster mine at Handsburg is running its two mills to their full capacity of 600 tons and engineers are figuring on doubling the present water supply so that the stamps may be increased to 200. The Butte mine is producing from \$5,000 to \$8,000 a month in dividends. The King Solomon has twenty tons of \$100 ore on the dumps and has again become a steady producer.

The Kennedy mine on the mother lode in Amador county, paid a 5 cent dividend last month. The ore that is crushed is only worth from \$3 to \$4 a ton, but as there is an immense quantity and it is handled cheaply, there is a small margin of profit. The 100 stamp mill runs night and day.

On Salt Creek a few miles west of Redding E.P. Conner has a platinum mine that promises to be a bonanza. It is called the Gypsy. Some black sand gathered from the trenches where he had been ground sluicing was analyzed, after the gold had been extracted by quicksliver, and it was found to contain a quarter of an ounce of platinum and \$140 in gold per ton.

Colorado Spennes, Oct. 20—The United States Reduction and Refining Company of

John Gilano, 20 years old, of Liberty avenue and Vermont street, Brooklyn, was fatally injured last night in a collision with an automobile owned by George H. Montrose of 125 Westminster road, Flatbush. Gilano was learning to ride a bicycle. Mr. Montrose was coming slowly along Glenmore avenue in his automobile with three friends. Gilano was attempting to cross Glenmore avenue on his wheel. Mr. Montrose did his best to avoid a collision, but Gilano lost his head and ran into the automobile. He was hurled headforemost against a sewer basin.

The collision caused Mr. Montrose to lose control of his machine and it ran upon the sidewalk and collided with a tree. He and his three friends were thrown out. Gilano was unconscious when picked up. He sustained a fracture of the skull when he struck the sewer basin and his body was wrecked.

PROF. JUDD HANGS HIMSELF.

Body Found by His Wife Suspended From a Rafter in a Barn.

Bal/TIMORE, Oct. 22.—Prof. Sylvester D. Judd. a biologist of note, hanged himself to a rafter in the barn at his home this afternoon. The discovery was made by learning the words. A failbut, and within a few weeks the new corporations. The capital stock consists of poperations. The capital stock consists of 300,000 shares of the par value of \$10 a share. Two hundred thousand shares will be issued at 100,000 of retained in the treasury. Among the incorporators and directors are James A. Talbut, vice-president of the First Na Hongo retained and actions of the Heinze attorneys. Alex Tarbet, mining man and capitalist of Utah.

The company has already secured control of a large tract of ground upon which there are ten producing shafts, including the continues of the Heinze attorneys. Alex Tarbet, mining man and capitalist of Utah.

The company has already secured control of a large tract of ground upon which there are ten producing shafts, including the producing. The yankee Boy mines. Some of them are small properties, but all the producing shafts of Contones in aliver. The pattern of the part of the par

per cent, copper, and is a fair average of the ore being mined in that part of the Butte district.

North Butte continues to be the wonder of Butte mining companies. From about 18,000 tons of ore the yield is nearly 3,000,000 pounds of copper, and when the new shaft is completed the output will be increased fully 30 per cent. The company is still buying additional mines and nevotiations for two are now pending. The new properties purchased, the repairs and improvements at the mines are all being paid for out of the earnings of the company.

The Lexington group of mines, which are under lease and bond to F. Augustus Heinze, lie west of the North Butte properties and adjoin the Corra mine, in which Heinze has found some rich copper ore. Mr Heinze will be the richest copper properties ever known in Butte. It will be some time before the Lexington will be in shape for mining on the lower levels, but when it is Mr. Heinze must have additional smelting facilities. He has announced that he will build a new smelter and is now figuring on it. It is not likely that the plant will be located in Butte. A number of improvements have been made at the smelter of the Montana Ore Purchasing Company, but the capacity and is treating 1,600 tons of ore a day. The Lexington mines are not a part of the United Copper Company.

city match will only be played annually, and to clear the way for it the New York and taking the count by years the metropolitan team won in two years and Philadelphia to every a match that the tough at the thought the letter was a leg of the contest in 1902 and 1904. As a legislation of the search that the tough at the tough at

in the Buckskin, hear froncerms, county, The Basic Dredging Company, operating placer mines at Centreville, Boise county, has its dam south of Payette about half done. It will be forty-five feet high and large water wheels will operate two 800 horse-power dynamos and two smaller ones. Besides supplying the dredges of the company with power other dredges and quartz mills in Boise Basin will be supplied.

SOUTH DAKOTA.

Boise Basin will be supplied.

SOUTH DAROTA.

DEADWOOD, Oct. 18.—The Imperial Mining Company has iust completed its payments on the McGovern group of claims, which it bought a short time ago at Baid Mountain. These claims were known to be very valuable, but since the company has been working them they have proved even richer than was thought. It is estimated now that take company has in sight a three years ore reserve to which it is constantly adding as now bodies are being discovered and opened up from day to day.

Work is moving rapidly at the Lucky Strike property and will be causled still more vigorously within the next few wocks. The company is sinkling the main shaft, which has now reached the death of 60 feet. It is the intention to sink at least 200 feet before cross cutting the cre hodies.

The Maripesa Mining and Milling Company is working its property by both a tunnel and a shaft and finds that the grade of ore in both phases is improving with development. The cross cut tunnel, which will be 800 feet long, is being run to tap the vein which crops out on the top of the hill. This will give several hundred feet of stoping ground. As soon as the contemplated developments are completed the mill will be receted. A new body of ore 9 feet in width, with well defined walls, has just been discovered.

The Dakota-Calumet has suspended operations until it can put in further machiners which will be sufficient to handle the increased flow of water. During the last few weeks the shaft has been sunk 22 feet deeper, but the last round of shots that were put in opened up a water vein that flooded the mine and forced immediate suspension. Everything else in the shaft looks very promising, and the company will proceed at once to order machinery which will handle the water satisfactorily.

The Dakota-Calumet has suspended operation to order machinery which will handle the water satisfactorily.

The Jakota company is shipping dally a train load of good ore, which is improving steadily in character. The average output is

has announced that he will build a new smeller and is now figuring on it. It is not likely that the plant will be located in Butte. A number of improvements have been made at the smelter of the Montana Ore Purchasing Company, but the capacity of the plant has been reached. The concentrator at Basin is also being worked to capacity and is treating 1,600 tons of ore a day. The Lexington mines are not a part of the United Copper Company.

IDAHO.

Bouse, Oct. 15.—The Morning mine at Mullen, in the Cœur d'Alene district, is now under bond to the Federal Mining and Smelting Company for \$3,000,000. The bond is a very short one—just long enough to allow of arrangements for the cash transfer. The Morning property is a group including the Evening, trouse and You Like, each of which is a great producer of lead and silver. All of them are tapped at the depth of 1,000 feet by a working tunnel. So far the mines have produced \$7,500,000 a year, giving a profit of \$200,000.

The Bunker Hill and Sullivan Company, near Wallace, has declared the ninety-fifth dividend, amounting to \$150,000. This makes the total since the first of the year the corremous amount of \$2,775,000, and the total todate of \$5,046,000. The regular monthly dividend now are \$150,000. It is considered the greatest mine in the world.

Considerable work is going on in Black Warrior district, near Atlanta. A tunnel is

HAVE been asked many times, by many people, just

what is the most important step in the making of a cigarette; just what quality it is, that makes one better

than another. This question is difficult to answer. There

are many steps—some perhaps of more vital importance than others, but all essential to the production of fine quality. The unequaled richness of flavor and aroma
